Network access at student hostels (Mac Leopard)

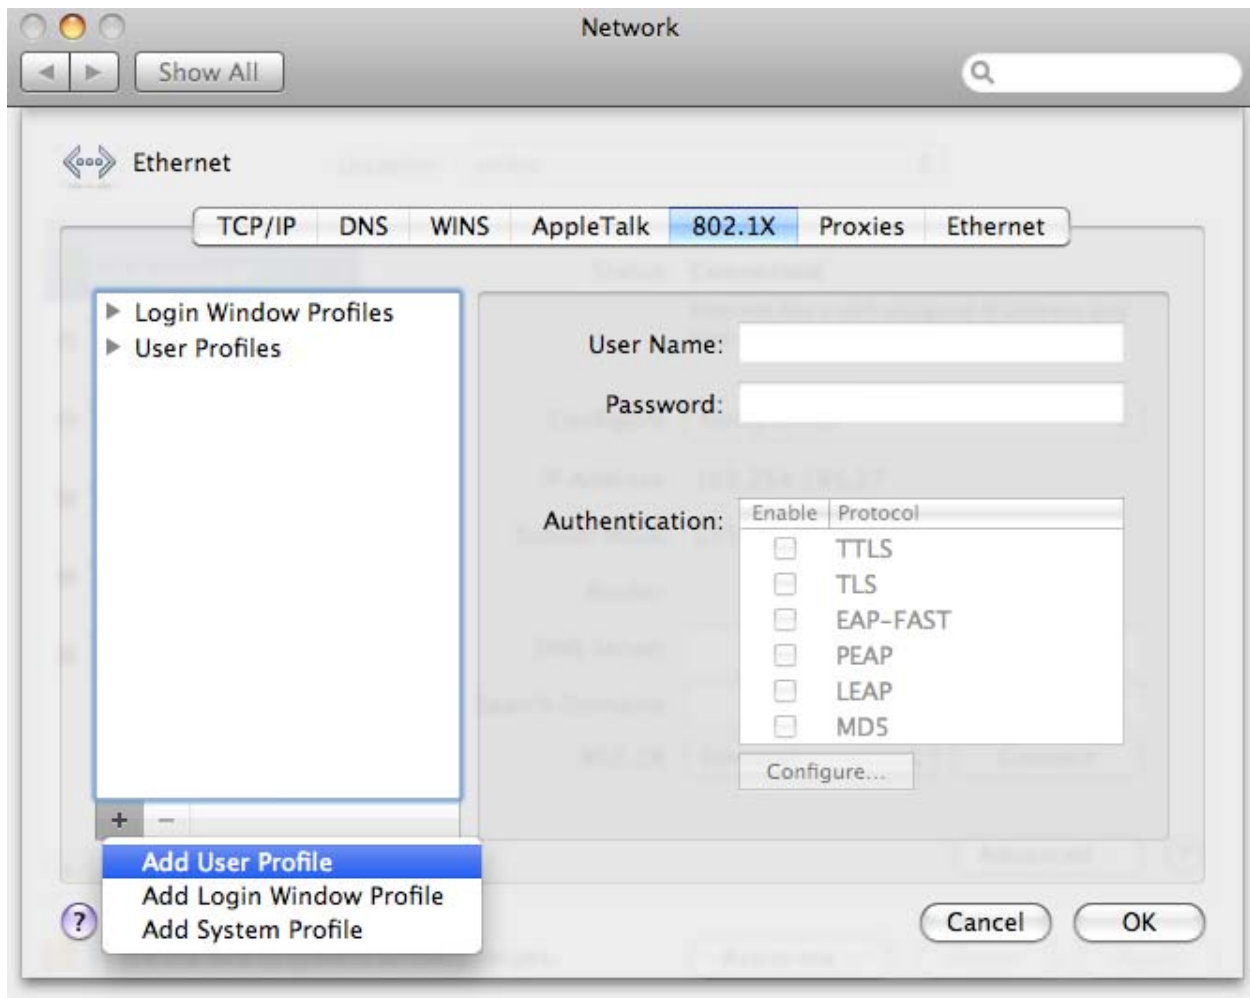

First of all, open your “System Preferences” an click onto “Network”

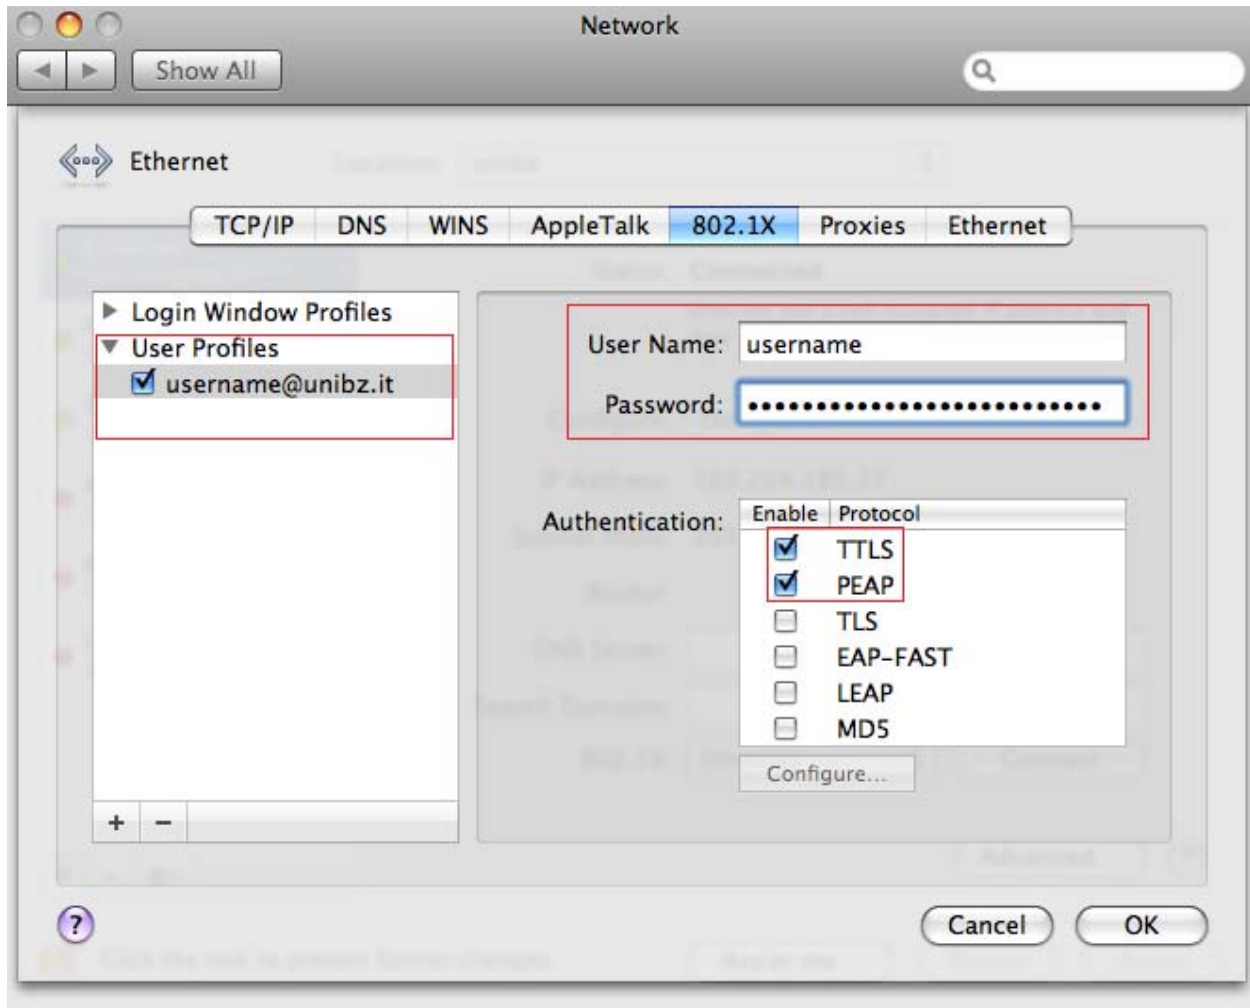

In the following window, go to the "Ethernet" part and click to "Advanced"

Switch to the tap “802.1X”. Then “Add a User Profile” by clicking on the “+” icon.

Insert your username and password in the designated text fields and check that all the other options are marked like in the picture below.

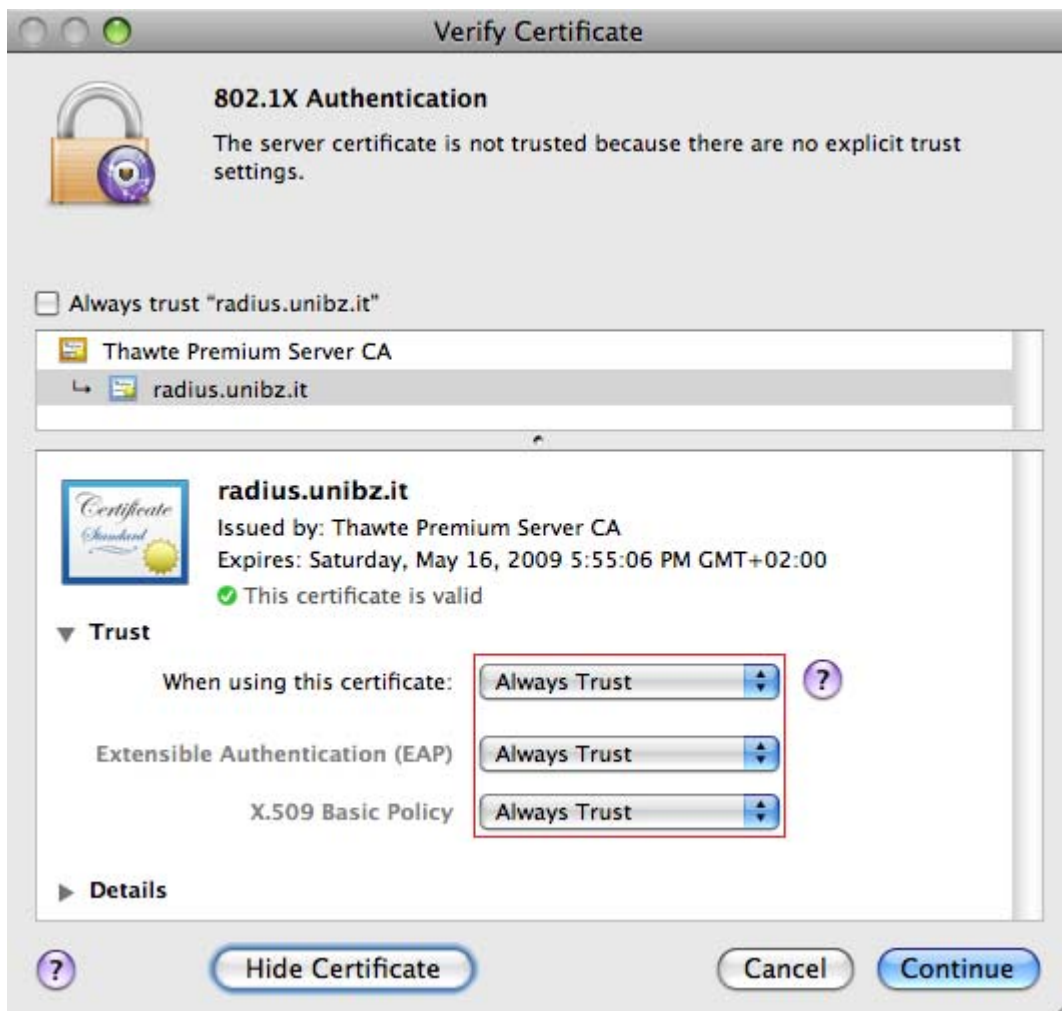

Then confirm with OK

At your first logon an authentication message appears. Click to the button “Show Certificate”

Click on “radius.unibz.it” then choose “Always Trust” on each dropdown menu. Continue with “Continue”.

Congratulation, you successfully configured your Ethernet.
