

**PhD scholarships bound to specific research topics/areas:**

2 scholarships linked to specific research topics:

1. High-Precision IoT Instrument for Electroantennography in Experimental Entomology: Detecting Volatiles Perceived by Insect Antennal Olfactory Systems (financed by Eurac Research, supervisor Prof. Angelika Peer, dr. Roberto Mendicino)
2. Advanced Electronic Readout Solutions for Sensing Applications (financed by Fondazione Bruno Kessler, supervisor prof. Luisa Petti, dr. Andrea Gaiardo)
